

## Allcom Products

**Allcom Products** has announced a new line of Programmable Vehicle Device Timers. The VT12 series is offered in single, two and three fused outlets. The unique feature is the 40 Amp Load Current Rating and is weather resistant. The unit can be mounted anywhere in the vehicle. This product is a perfect fit for buses, ambulances, fire truck, police vehicles and rail fleets. You can select the specific mode of operation: Ignition Sensing or Auto Detect. Fuses are included with VT12 series and glow to indicate its circuit is powered. The timer and logo will light when the device is powered on. Programming can be done in 15 minute intervals from 15 mins to 15 hours.

Part Number are as follows:

VT12-001

VT12-002

VT12-003

Call Primus for more information 800-435-1636.

### Unique Features

#### *40 Amp Load Current Rating*

Most device timers on the market can only handle 30A.

#### *User Selectable Mode of Operation: Ignition Sensing or Auto Detect*

Ignition Sensing: Turns on equipment when ignition is turned on; begins shutdown timer when ignition is turned off.

Auto Detect: Turns on equipment when engine is running and the charging system is operating; begins shutdown timer when engine is turned off.

#### *Illumination*

Allcom Logo lights up when the device is powered on.

Each fuse glows to indicate its circuit is powered; works with any fuse.

Timer lights up to indicate it is in operation.

#### *Built In Fuse Holders - fuses are sold separately*

Unlike the competition, the VT12 Series has the fuse holder(s) built in. No need to order and pay for extra parts and labor to add the required fuse holders.
